IDC4022C Module 6 Project Part 2 Visualization of Classifier Performance Comparison

This assignment will visualize the results of the classifier comparison completed in part 1.

Instructions:

Classifiers to Compare:

Provide visualizations of the comparisons completed in part 1, these should include:

Confusion matrix heatmaps of the performance all 4 classifiers

A bar chart of the accuracy values

A bar chart of the ROC AUC metrics

Include a summary of your results in a Word document, which should correlate with the summary completed for part 1.

Commit your Python solution and Word document to the GitHub classroom repository.
